imysa.gaspar@gmail.com | <https://www.linkedin.com/in/ysa-gaspar/> | <https://github.com/ysa-on-designs> | Manila, PH

Summary

Information Systems sophomore specializing in UI/UX and Systems & Design Analysis, translating requirements into wireframes, process flows, and data diagrams. A proven operations leader with experience coordinating teams and managing documentation.

Education

De La Salle-College of Saint Benilde

Information Systems, Software Engineering

Manila, Philippines

Expected 2028

- Dean's Lister

Leadership & Activities

Developers Society Benilde

Chief Operations Officer

January 2026 – Present

- Handle post-documentation reports for concluded events, covering around 6 events in the past few months
- Coordinate with school administrators and the IS Department Chairperson to promote events via department and university-wide emails, extending reach beyond the org

Chief Operations Officer Understudy

August 2025 – December 2025

- Worked alongside outgoing officers to manage org events as part of the leadership transition, learning how projects were coordinated across 5 departments
- Shadowed the Executive Board to learn the responsibilities and workflows of the Chief Operations Officer role

Association of Information Management

Internal Relations Associate

March 2025 – August 2025

- Managed pre-event communications for 100+ recipients through email blasts, with post-event outreach scaled per event
- Handled post-documentation reports and created email marketing materials for internal communications

Projects

MyAlaga: Pet Appointment Management Hub

UI/UX Designer

Information Management

March 2026

- Designed wireframes for a pet appointment booking system, covering customer sign-up, service booking, and staff dashboard flows.

IponTayo: AI-Integrated Personal Finance App

UI/UX Designer

Systems Analysis and Design

November 2025

- Designed the high-fidelity prototype for an AI-integrated personal finance app, covering net pay calculation, budgeting, and goal-tracking interfaces.

Skills

- **Design & Prototyping:** Figma (wireframes, prototyping, mockups)
- **Technical & Analytical:** C#, C++, Python, SQL, Kotlin, Systems/Business Analysis, Process Mapping
